Our work in US, Europe and Asia covers:

- Development of new treatments from phases Ib to III
- Digital health apps

How we're different

- Every project is staffed by **former payers / Health Technology Assessment** agency officials who have assessed orphan drugs

A testimonial

Having that view every week from the other side of the table was pretty eye-opening"

Evidence

- Evidence repository development
- HTA and payer evidence requirement mapping
- Evidence uncertainty impact assessment
- Evidence planning

Price

- Early price finding and forecast
- Attribute pricing
- Launch pricing

Value

- Early Scientific Advice
- Value proposition (story, message) development
- Positioning in treatment pathway
- Value to healthcare system

Communication

- Global value dossiers
- Country dossier (e.g., AMCP, G-BA)
- Objection handlers
